

This is the readme file for the source code.

The “**CS589_Project**” folder is the project that export from Eclipse, you can easily import this project into eclipse.

All the source codes are contains in the “**CS589_Project\src**” folder.

There are two java files:

GasPump.java is the original source code with two testing oriented methods.

Test.java contains the main function of the test driver.
